

## **Health & Safety Business Partner, Mines & Export - Whyalla**

- **Are you an experienced safety practitioner?**
- **Are you looking for a role "outside of the ordinary?"**
- **Come and work at a mine site!**

If you are a safety professional looking for a new and exciting work environment then consider our mine site. In this role you will enjoy the environment, with much of the work being outdoors, so this is not your ordinary safety desk job.

You will provide safety leadership and support to the mines operations management and frontline leaders for the delivery of business safety targets. You will also support operations management to ensure compliance to legislation and maintenance of OneSteel's WorkCover self insurance status. You will have a track record in previously providing technical safety support and have the ability to work with shift crews to ensure clarity of purpose. Your strong coaching and mentoring skills will enable you to develop the technical capability of shift safety co-ordinators.

Additionally, you will undertake standard safety tasks and activities such as hazard identification, risk management, accident / incident investigations and change management. Overall, you will be tasked with keeping people safe on site and achieving Goal Zero targets.

### **You will have:**

- A relevant tertiary qualification in OH&S
- Demonstrated experience in mining and/or heavy engineering or manufacturing
- Advanced skills in the Microsoft office suite of programs
- Comprehensive knowledge of OH&S legislation
- Highly developed communications skills, both written and verbal

You will be rewarded by working in an exceptional environment with a variety of work systems, plant and equipment. Your peers and colleagues are mining professionals from engineering, geological and technical backgrounds. You will also have the advantage of working within a cohesive network of safety professionals within the OneSteel Whyalla team.

**If the above sounds challenging and rewarding to you,  
we invite you to apply.**
