

## **SAFETY MANAGER**

Location: Gladesville (will be required to visit construction sites)

Remuneration: negotiable

This role is for a person with a few years experience in safety management for a Construction company ideally and possibly has experience as a Return -to-Work Coordinator.

The Safety Manager will be required to implement the new OHS&R management system that has just been developed for this Construction company which has multiple construction sites.

In particular he or she will:

- Adopt a firm attitude to OH&S disciplines and set a personal example.
- Develop a Project implementation plan to rollout and implement a new OHS & R management system to all building sites and staff within the business
- Work with Project Managers and Directors to implement site specific OHS & R plans.
- Update any amendments to the company OHS&R procedures
- Assist and direct Project Managers and Site Managers to implement the new OHS&R management system on their sites
- Be the Return to Work Co-ordinator for the business.
